

Andy Pham

ap3879@drexel.edu | Philadelphia, PA | [Website](#)

EDUCATION

Drexel University

B.S. in Software Engineering

Cumulative GPA: 3.66

Expected Graduation: June 2027

Philadelphia, PA

TECHNICAL SKILLS

Programming Languages: Python, C, C#, C++, Java, Bash, JavaScript, HTML, CSS, R

Frameworks & Libraries: OpenCV, MediaPipe, Node.js, React, Three.js, .NET, Entity Framework, Dapper ORM, Express, Axios, XUnit, PITest

Tools & Technologies: Git, Linux, CI/CD, Excel, Firebase, PL/SQL, MySQL, PostgreSQL

WORK EXPERIENCE

Holman

Software Developer

March 2025 - Sept. 2025

Remote, Mount Laurel, NJ

- **Developed** and implemented new features for their client vehicle ordering and fleet management system, which processes over 100,000 orders annually and drives more than \$5 billion in vehicle transactions
- **Migrated** legacy applications and components from VB6 to .NET 8, leveraging Copilot to optimize code efficiency
- **Contributed** to Agile development processes, participating in daily stand-up meetings, and using Azure DevOps to report progress and align team efforts

PROJECT EXPERIENCE

[Language Learning Flashcards](#)

Headstarter Program Project

Aug. 2024

Remote

- **Developed** a full-stack web application for AI-powered language learning flashcard generation
- **Implemented** user authentication and database management with Clerk and Firebase integration
- **Utilized** Google Cloud APIs for language translation and pronunciation features
- **Streamlined** asynchronous operations and API interactions using Axios for efficient data handling
- **Designed** serverless architecture leveraging Firebase Firestore for scalable data storage

Virtual Webcam Painter

Personal Project

Feb. 2024

Philadelphia, PA

- **Created** a Python application utilizing the user's webcam along with OpenCV and MediaPipe libraries for real-time computer vision and machine learning capabilities, allowing hand gesture-based painting
- **Integrated** custom hand gesture recognition with MediaPipe's Palm Detection and Hand Landmark Models, distinguishing between 3 specific gestures, with 90% accuracy, for painting, color/tool selection, and erasing
- **Leveraged** the OpenCV library to enable webcam interaction, which allowed for toolbar display and visual representation of selected tool/color for smooth user interface operation

RELEVANT EXPERIENCE

Headstarter

Headstarter Software Engineering Fellow | Selected from 41,803 applicants (37.8% acceptance rate)

July 2024 - Sept. 2024

Remote

- **Built** 5 AI web applications in 5 weeks using React, Next.js, Firebase, and Vercel with agile sprints and CI/CD deployment
- **Developed** AI customer support agent with RAG pipeline using OpenAI and Pinecone for knowledge base-driven responses
- **Created** SaaS flashcard generator leveraging Llama 3.1 and Groq API with Stripe payment integration
- **Participated** in weekly technical sessions with engineers from Google, Y Combinator, Stanford, and venture-backed startups

Extern

Mobalytics Remote Extern

May 2024 - June 2024

Remote

- **Conducted** comprehensive market research analyzing 50+ Roguelike games and player behavior patterns
- **Crafted** a data-driven presentation with actionable recommendations for market expansion
- **Evaluated** game revenue models and design aspects, providing insights into user engagement
